I thank you all for listening and participating in a positive way towards a more reasonable solution. A very healthy exercise in democratic behavior. It is good to know there so many with passion to improve our community and work together to achieve an understanding of each other.

Peter

Subject: Heritage Hill Association thanks

Dear George, Peter and Don, Thank you very much for getting us to this point. All your work and words are very much appreciated! Yesterday's meeting was very informative on the needed process and I beleive puts us all on the same page. The Association looks forward to a positive and a cooperative working relationship to address our neighborhood's concerns. We will also start the same conversation with GVSU and just maybe, hopefully can come to a consensus with the University. We hope we can all be celebrating together on May 5 with the passage of the millage. I have already informed the Friends of Transit to add the Heritage Hill Association to the growing list of supporters. Please keep us informed of any needs and we will do the same.
Thanks again - Jan Earl
